

**REMARKS**

With the entry of the foregoing amendments, claims 1-10, and 12-20 are pending in the application. Favorable consideration is requested.

At the outset, applicant thanks the Examiner for the interview held in this case. In line with that interview, the applicant has amended the claims and submits the attached Rule 132 Declaration from Andre Roland, who has knowledge and experience in this technical area. Applicant submits that the amended claims, the Rule 132 declaration and the previous response overcome the prior art rejections lodged in this case (because no prior art discloses or suggests the claimed invention that employs "leakage current") and any claim objections. As those of skill in the art know, the applicant's "leakage current" features are not the same as Knoll's disclosures, and, moreover, applicant's invention yields superior results.

In view of the foregoing amendments and remarks and the attached Rule 132 Declaration, applicant submits that this application is in condition for allowance. A notice to that effect is earnestly solicited.

If the Examiner has any questions concerning this application, the undersigned may be contacted at 703-816-4009.

GLOCKER et al  
Appl. No. 10/552,074  
February 4, 2009

Respectfully submitted,

**NIXON & VANDERHYE P.C.**
